

New light poles are coming to Birchfield Woods Cluster Association!

You may have noticed the current condition of many of the light poles in our cluster are degrading and rusting. The BWCA HOA board is working to replace the lights & poles.

Here are some important topics:

- 1) Only existing lights will be replaced, no new lights will be installed.
- 2) Brightness and angles will be adjusted for maximum safety but also minimize intrusion into homes.
- 3) LED fixtures are to be used which uses less electricity and will reduce the electricity bill.
- 4) The HOA Board has submitted an application to the Reston Association Design Review Board (DRB) requesting approval to replace the lights and poles.
- 5) Stay tuned to www.birchfieldwoods.org or Facebook or Nextdoor for updates.
